GENERAL MILITARY CULTURAL COMPETENCE			
<p>Serving Our Veterans-Behavioral Health Certificate: Military Cultural Competence</p> <p>Visit: Your Organization's Relias Learning Site OR http://vets.cequick.com/default.aspx</p>	<p><i>Target Audience: Behavioral Health Assistants, Behavioral Health Professionals, Case Managers Or Service Coordinators.</i> In this course you will acquire knowledge regarding military culture so that you can understand, communicate, and effectively interact with service members and their families. Having basic knowledge regarding the values, structure, policies, and expectations of the military can promote a stronger patient-provider alliance and help develop skills to provide more effective clinical care. This course teaches you military rank structure, the branches of service along with their missions and core values, active versus reserve status components, demographic characteristics and general and deployment related terms. You will utilize a blend of experiential exercises and self-study to give you the tools you need to implement this knowledge.</p>	<p>1.25 hrs</p> <p>CE/Free with Relias Learning Access</p> <p><i>See Web for complete list</i></p>	<p>Relias Learning, National Council for Community Behavioral Health</p>
<p>Military Cultural Competence</p> <p>http://deploymentpsych.org/military-culture</p>	<p><i>Target Audience: Behavioral Health Providers in all disciplines; Psychologists; Social Workers; Counselors; Nurses; Chiropractors and other interested health care providers.</i> This interactive online training course provides an overview of military culture to include organizational structure, rank, branches of service, core values, and demographics as well as similarities and differences between the Active and Reserve components. It is intended to assist civilian mental health providers in better understanding, communicating and effectively interacting with Service members and their families.</p>	<p>1.25 Hrs</p> <p>CE/\$30</p> <p>No CE/Free</p> <p><i>See Web for complete list</i></p>	<p>Center for Deployment Psychology (CDP)</p>
<p>Treating the Invisible Wounds of War (TTIWW)</p> <p>http://www.aheconnect.com/citizensoldier/cdetail.asp?courseid=citizensoldier1</p>	<p><i>Target Audience: Behavioral Health Providers in all disciplines; Psychologists; Social Workers; Counselors; Nurses; Chiropractors and other interested health care providers.</i> This course is designed to help behavioral health providers and clinicians in all disciplines providers - who may see a veteran or family member on an unrelated issue - develop a better understanding of the culture in which veterans and their families live and work, and provide best practices for identifying, assessing and treating mental health disorders that result from the trauma of war.</p>	<p>4 hrs</p> <p>CE/Free</p> <p>NBCC</p> <p>CNE</p> <p>DC</p> <p>NC Psycho</p> <p>NASW</p>	<p>Army OneSource, North Carolina Area Health Education Center (AHEC), and the Citizen Soldier Support Program (CSSP)</p>

POSTTRAUMATIC STRESS DISORDER (PTSD)			
<p>Serving Our Veterans-Behavioral Health Certificate: PTSD Then and Now, There and Here</p> <p>Visit: Your Organization's Relias Learning Site OR http://vets.cequick.com/default.aspx</p>	<p><i>Target Audience: Behavioral Health Assistants, Behavioral Health Professionals, Case Managers Or Service Coordinators, Correctional Or Criminal Justice Professionals, Corrections Behavioral Health Professional, Information And Referral Specialists, Social Services Assistants, Social Services Professionals.</i> This presentation shares research on returning veterans and the numbers with PTSD. The presenter distinguishes between different types of traumatic events both domestic and foreign. Using the Iraq and Afghan wars, Dr. Ursano provides the data to substantiate the numbers of veterans who are diagnosed with PTSD. Additionally, Dr. Ursano breaks down the different symptoms of PTSD and demonstrates how PTSD may manifest itself in returning veterans differently</p>	<p>1 hr</p> <p>CE/Free with Relias Learning Access</p> <p><i>See Web for complete list</i></p>	<p>Relias Learning, National Council for Community Behavioral Health</p>
<p>Serving Our Veterans-Behavioral Health Certificate: Epidemiology of PTSD in Military Personnel and Veterans</p> <p>Visit: Your Organization's Relias Learning Site OR http://vets.cequick.com/default.aspx</p>	<p><i>Target Audience: intermediate and advanced level Psychologists; intermediate and advanced level Social Workers; Nurses.</i> Based on content from the Center for Deployment Psychology, this training will provide you with information on the etiology and prevalence rates of Posttraumatic Stress Disorder (PTSD) in the military population, highlighting current research findings on this topic. You will better understand how some military-specific stressors and protective factors may impact risk for PTSD. Finally, you will learn the components of current evidence-based clinical strategies and interventions for assessing and treating PTSD with a military/veteran population.</p>	<p>1.5 hr</p> <p>CE/Free with Relias Learning Access</p> <p><i>See Web for complete list</i></p>	<p>Relias Learning, National Council for Community Behavioral Health</p>
<p>Serving Our Veterans-Behavioral Health Certificate: Prolonged Exposure Therapy for PTSD for Veterans and Military Personnel</p> <p>Visit: Your Organization's Relias Learning Site OR http://vets.cequick.com/default.aspx</p>	<p><i>Target Audience: Behavioral Health Professionals, Corrections Behavioral Health Professional, Social Services Professionals.</i> Most individuals who have been exposed to a potentially traumatic event, such as sexual assault/abuse, physical assault/abuse, natural disasters, motor vehicle accidents, and combat, are able to recover naturally. Others, however, get "stuck" at some point during the recovery process and develop post-traumatic stress disorder (PTSD). Understanding and exhibiting competence in working with symptomatic trauma survivors is a critical skill for clinicians. In this course, you will be introduced to one of the most effective treatments for individuals who have PTSD, called Prolonged Exposure therapy (PE).</p>	<p>1.25 hrs</p> <p>CE/Free with Relias Learning Access</p> <p><i>See Web for complete list</i></p>	<p>Relias Learning, National Council for Community Behavioral Health</p>

<p>Serving Our Veterans-Behavioral Health Certificate: Cognitive Processing Therapy for PTSD for Veterans and Military Personnel</p> <p>Visit: Your Organization's Relias Learning Site OR http://vets.cequick.com/default.aspx</p>	<p><i>Target Audience: Behavioral Health Professionals, Corrections Behavioral Health Professional, Social Services Professionals.</i> While most people who are exposed to a trauma recover naturally, a significant minority do not. Therefore, understanding and competence in treating post-traumatic stress disorder (PTSD) is an important skill for mental health providers to have. In this course, you will be introduced to one of the most effective treatments for individuals who have PTSD, called Cognitive Processing Therapy (CPT). An evidence-based, short-term treatment for PTSD developed by Dr. Patricia Resick and her colleagues, CPT is a form of cognitive behavioral treatment. This course provides an overview of the theory behind, empirical support for, and biological model of CPT. Through a session-by-session review of the CPT protocol, you will learn about the different phases of treatment, cognitive therapy techniques, and trauma-related themes.</p>	<p>1.25 hrs</p> <p>CE/Free with Relias Learning Access</p> <p><i>See Web for complete list</i></p>	<p>Relias Learning, National Council for Community Behavioral Health</p>
